NORIE AND WILSON, 156 MINORIES, E.

MITCHELL AND HUGHES, 140 WARDOUR STREET, W.

AND OF ALL NAUTICAL BOOKSELLERS.

1901.

## PREFACE TO FOURTH EDITION.

---

IN issuing the present Edition, the Publishers, with great pleasure, acknowledge the increasing sale of the Work. In order to enlarge its general usefulness, they have appended two original sets of Tables, the first giving the rate per day on Wages from 12s. a Month to £25 (excluding fractions), and the other, the rate per day on *Incomes* from £100 per Annum to £1000, for the compiling of which they are indebted to the kindness of Mr. PAGE, of the Pay Office of the Royal Mail Steam Packet Company.

The Publishers trust, therefore, that the new Tables now appended to the Work will in every way prove the desirability of their addition to its contents.

## PREFACE TO FIRST EDITION.

---

It may be said that a work like the present scarcely requires a Preface, inasmuch as it speaks for itself as regards the object of its compilation. As, however, it takes up new ground, and is the first of its peculiar kind, the Author may be excused a few words of remark.

It appeared to him somewhat extraordinary that whilst almost every kind of calculation necessary for the transaction of commercial affairs was facilitated by "Tables" constructed to meet the requirements of the case, no such aid was available to those engaged in the Pay Offices of our Mercantile Marine; and the omission was the more striking in consequence of the enormous amount of business to be transacted, and the frequent necessity for the most urgent promptitude in accomplishing it. Those engaged in the payment of Seamen's Wages will need no illustration of the difficulties which their vocation entails, and the vast amount of labour necessary to overcome them.

It was the practical experience of these difficulties, whilst engaged in the Pay Office of the Royal Mail Steam Packet Company, which suggested to the Author the idea of endeavouring to lessen them, by the construction of a set of Tables for his own use; but in the attempt to accomplish this intention it soon became evident that the work would be far too

extensive and valuable to be reserved for mere private use, and the Author therefore determined to render it so complete and efficient as to be worthy the acceptance of the public. He now submits the result of his labours to those for whose use it is intended, with the assurance on his part that the form adopted is the most simple which he could devise, and the execution as perfect as the most rigid carefulness of calculation could ensure.

If he may be permitted to judge of its utility by his own experience, he feels convinced that the Work will be regarded as a boon by the Shipping community, and he has no doubt that its accuracy will soon cause it to be regarded as an authority by all who are interested in its indications.

He may, in conclusion, venture to hope that the book may also prove in some slight degree instrumental in bringing about an uniformity as regards the understanding of "what is a month" in Seamen's engagements. There is much diversity of practice on this point, but the Author has adopted the *calendar* month as the basis of his calculations, which interpretation is by far the most general and, as he conceives, the most correct. As a want of uniformity, however, although perfectly unobjectionable in itself (where understood by all parties), is apt to lead to confusion and disputes, the Author would willingly be instrumental in accomplishing anything which may tend, however remotely, to promote the contrary.

LONDON, *May*, 1854.

## INTRODUCTION TO TIME AND MONEY TABLES.

---

THE following part of the Work consists mainly of two sets of Tables: one of "Time," the other of "Money."

Of the former there is one for every day in the year, and they are accordingly headed by their respective dates, from the 1st of January to the 31st December. Whatever day a Seaman may have joined his ship, it will be at once seen, on reference to the Table headed with that particular day, how many months and days he has served from that time up to the day of his discharge. Thus, if a man joined a ship on the 13th *April*, and was discharged on the 2nd *November*, reference will be made to the Table headed with the *former* date, and opposite to the 2nd *November* in that Table, 6 months and 21 days will be found indicated, which is the correct time.

The second set of Tables are those of Rating, shewing the amount due for any number of months and days, at any wages from 10s. per month up to £50. In the instance above cited, reference would immediately be made to the Money Table containing that particular rate of Wages at which the man was engaged, and opposite to "6 months 21 days" will be found the exact sum due.

The Tables are based upon the almost universal principle of reckoning by the *Calendar* Month, which, it is nearly superfluous to say, is that portion of time included between any given day in any month and the preceding day of the month ensuing, both inclusive,—*e.g.*, a man engaged on the 13th March has

completed a calendar month's service on the 12th April. Therefore, when any term of service extends from one year into another, or even over several years, all that has to be done is to count the number of months up to that day in January which will be one day short of the day of entry, and the Tables will supply the remainder.

It is almost needless to observe that, although the main object of the Tables is to furnish calculations for Seamen's Wages, they are equally applicable to any other purpose where the Calendar Month forms the basis of reckoning.

### LEAP YEAR.

As it would not have been practicable to have combined with the ordinary Tables those additions or alterations which the occurrence of the 29th February renders necessary in the above year, these are provided for by separate Tables ; which are *three* in number, and will be found immediately following the Rating Tables.

The *first* is a Table shewing the time of service when the day of ENTRY is the *29th February*.

The *second* shews the time of service when the date of DISCHARGE is the *29th February*.

The *third* gives those few cases in which a day is required to be *added* to the ordinary calculations ; and it will facilitate the use of the work to bear in mind that it is *only where the date of discharge occurs in the month of March* that this Table need be consulted. With this exception the ordinary Tables are equally correct for Leap Year as for others.
